

Method Detection Limit Hootenanny (MDL Workshop Part II)

October 24, 2018

1:00 – 4:10

Metro Wastewater Reclamation District

6450 York St

Denver, CO 80229

The MDL Hootenanny is a follow-up to the January 2018 MDL Workshop. The MDL study data that have been collected will be presented. The regulatory implications will be discussed in a group setting and contract labs will discuss the challenges and successes they have faced with the new MDL process. Additionally, there will be breakout sessions to provide more help in a smaller group setting. Please bring laptops and datasets to work with. **Similar to January, this is meant to be an informal event for analysts to learn more about MDLs and see how the new process is impacting labs in the region.** Please come with questions and issues for discussion.

Lunch is **NOT** provided, but light snacks will be available during the break.

Agenda
